

# What is AI policy?

Anupam Guha

What is a State? What is policy? Why should  
you care?

# Political economy: What is that?

Value and commodity

# Basic AI governance: need and concepts

A socio technical system

A system with a political economy impacting THE political economy

Transcendent vs Immanent Critiques

Instrumental vs normative frameworks

# FATEH

Fairness. Accountability. Transparency. Ethics. Human Rights

(we will spend a whole week on this!)

# Data governance, should it exist?

Is data a commodity?

Should trade in data be regulated?

Localisation?

Rights, individual, community, social

(we will spend a whole week on this!)

Does India have an Indian AI policy?

What exactly is the NITI Aayog? What is responsible AI?

(we will spend a whole week on this!)

Let us talk about FRT, Police, and Judiciary

(we will spend a whole week on this!)

Regulations? What about innovation and freedom?  
Are we Luddites?

The curious case of Google ethics council

Is AI magically creating value?  
Is there a ghost in the machine?

(we will do this in PS 644!)

Techno solutionism and reification

AI as the scapegoat, or the machine never  
“understands” or “does” policy

# Discussion
